Inflation and Cryptocurrency

If you own cryptocurrency you have likely seen several are trending downward. But you may not know why. Here is a good article from the Wall Street Journal to explain. The drop in values appears consistent with traditional investments due to the actions of the Federal Reserve. Also, experts smarter than yours truly are predicting increased inflation may push more folks into the crypto space. Is this concerning? That depends. My only advice is to educate yourself and pursue your personal best interest.

Reminder: our Business Incubator Program remains open. Submit your application now because it could get you $5000 and 100m VTC toward improving your small business efforts!
